The five different layers in earth atmosphere are Troposphere, Stratosphere, Mesosphere, Thermosphere and Exosphere.

They are explained as follows □

Troposphere: This layer is very near to the earth surface. In this air temperature decreases as the height increases. Most of the air mass is consisted in this layer only.

the planet and how the planet has changed over time. Geologists search for fuels and minerals, study natural hazards, and work to protect Earth's environment.

What is Earth Science? |
Geology.com

Environmental Earth Sciences is an international multidisciplinary journal concerned with innovative approaches and significant aspects of interaction between humans, natural resources or unique geographic zones, with emphasis on the solid earth. In pursuit of these topics, the geoscientific community is invited to contribute their knowledge and experience.

Environmental Science provides
an overview of how science
affects our environment. We
focus on interactions between the
solid Earth, its water, its air and
its living organisms, and on
dynamic, interdependent
relationships between these four
components. Earth and
environmental scientists also
consider how these relationships

Earth Science Geology, The
Environment and Universe ...
Geology is the study of materials
that make up the Earth, the
processes that form and change
these materials, and the history
of the planet and its life-forms
since its origin. Oceanography is
the study of oceans, which cover
nearly three-fourths of the planet.
Environmental science is the
study of the interactions of
organisms and their surroundings.
