### Implementing Lean Software Development

Lean development is the application of Lean principles to software development. Lean principles got their start in manufacturing, as a way to optimize the production line to minimize waste and maximize value to the customer. These two goals are also relevant to software development, which also: Follows a repeatable process

### Book Excerpt: Implementing Lean Software Development: From ...

The first principle of lean software development is to eliminate waste. Some obvious forms of waste include time spent building, analyzing, or designing features that won't be used; or time spent supporting software and fixing bugs. But there are sneakier forms of waste as well, such as premature optimization (more on this later).
