~~Industrial Design and Product  
Development — UPC ...~~

Product design is just about as it sounds — design of a product meant to be sold to consumers, whatever that product might be. It's how we get new things or new versions of things we already use.

Industrial design is the same thing, but it more pertains to things that have a functional value, especially things that

# Access Free Product Design And Development Industrial Engineering 2011

require industrialization to produce, such as vehicles, buildings, and so forth.

~~The difference between product design and industrial ...~~

An industrial designer's role in the product development process is to establish the design language of a product, as well as the corporate branding and identity. They are a vital element of the process because they have insight into market trends and consumer preferences.

~~The importance of industrial design in product development~~
